

ARTWORK / PROOF REPORT

Independent portfolio demonstration. Not print certification. No artwork has been sent to a printer.

Artwork review for 3.0 × 3.0 inch print completed. The uploaded PNG (150×150 pixels) displays a dark green rounded rectangle with centered white text reading "FIELD NOTES / ORIGINAL" on a cream background. At the requested print size and 300 DPI target, the image resolution (50 DPI effective) is significantly below professional print standards. Low-resolution previews cannot certify print accuracy, colour reproduction, or embedded PDF raster DPI. Visual layout appears clean and centered, but print quality will be severely limited by the extremely low pixel density.

Page 1 preview

Effective resolution

measured / warning / measurement:page-1

50.0 DPI at 3 x 3 inches; demonstration target is 300 DPI.

Transparency

measured / info / measurement:page-1

No transparent pixels detected; background colour is not inferred.

Transparent margins

measured / info / measurement:page-1

Left/top/right/bottom pixel margins: [0, 0, 0, 0]. These are not certified bleed measurements.

Critical resolution mismatch

requires-human-review / error / preview:page-1

Artwork is 150×150 pixels for a 3.0×3.0 inch print. This yields approximately 50 DPI, far below the target 300 DPI. A properly prepared file at 300 DPI would require 900×900 pixels. This severe undersampling will result in visible pixelation and blurred output.

Visual composition acceptable

model-suggested / info / preview:page-1

The layout is clean and centered with good contrast between the dark green badge and cream background. Text appears properly aligned within the design element.

Colour reproduction unverified

requires-human-review / warning / preview:page-1

Low-resolution preview cannot certify accurate colour reproduction for the dark green and cream tones. Actual printed colours may differ from screen display.
